

冬籠り

FUYUGOMORI

A WORD

Fuyugomori

"Winter confinement" — the old word for the deliberate drawing-in of the cold months. Not the grim sense of being snowed in, but the chosen one: the bear to its cave, the seed under the soil, the household to its warm centre. A season understood as withdrawal rather than lack.

It reframes the whole winter project at home. You are not waiting out the dark; you are keeping a den through it. *Fuyugomori* gives you permission to make the room smaller, lower, warmer — to close the curtains early, light the corner, and treat the long evening as the point of the season rather than its penalty.
