

WINTER, A SHORT LIST

Eight small moves

No purchase required for most of it. Tear this page out, or don't.

-
- Swap one cool-white bulb for warm 2700K. Tonight.
 - Turn off the overhead; light from three low points instead.
 - Layer two weights of the same-colour wool, don't buy one new throw.
 - Clear one surface back to a single object plus one branch.
 - Move the brightest thing in the room out of the main sightline.
 - Group small objects in odd numbers — three, not two or four.
 - Keep one ember of terracotta; remove the second one.
 - Make tea slowly, once, at four o'clock. Phone in another room.
-
