

THE WALL ABOVE

One print, well framed

The entry's one piece of art does a disproportionate amount of work, so it is worth getting right. A single botanical line print — a eucalyptus, a single stem — in a light oak frame, hung at eye height and slightly off-centre to the console, is the whole gesture. Spring is the season for the botanical prints; the line drawing of a leaf is the same instinct as the branch in the vase, made permanent.

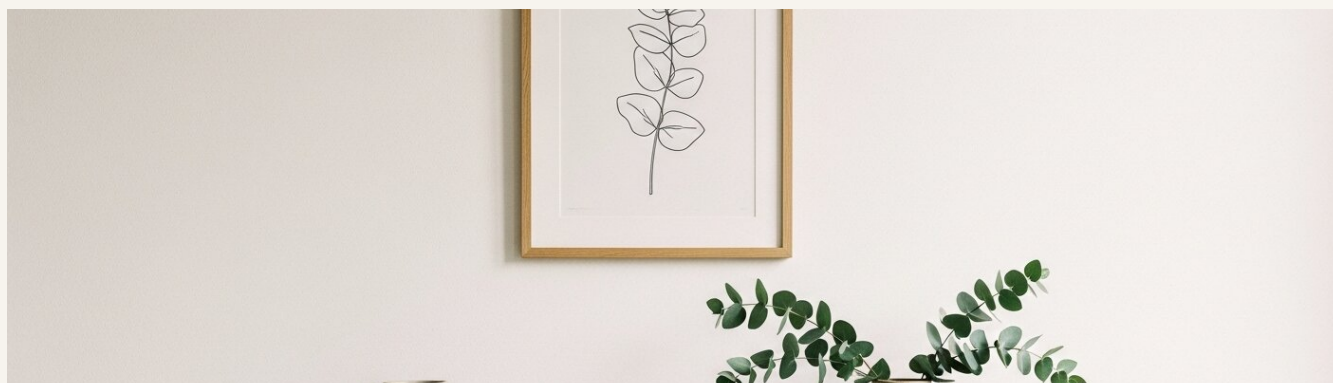

For the print, the Calm & Oak Collection. For the frame to hold it, the new Frames guide will tell you exactly which standard size fits each print, oak or black, mat or no mat.
