

IN PRACTICE

Three intervals to protect

Beside the art Leave more bare wall around a single print than feels comfortable. The margin is what tells the eye the print matters. Crowd it and the print becomes wallpaper.

On the table Keep one whole end of the table clear. Not for use — for air. A table with a held-open space reads calm even mid-meal.

In the doorway Don't fill the threshold with a console or a plant. The open passage between in and out is the most valuable empty space the house has. Guard it.

Calm & Oak
