

THE WALL BEHIND

One landscape, for the long light

Summer is the season for the minimalist landscape prints — a soft horizon, a single distant sun, a calm that the long bright days can borrow. Hung behind the breakfast threshold, a single horizon print extends the view even on the grey days, and ties the wall to the garden beyond the door.

For the print, the Calm & Oak Collection — the Horizon, the Dusk, the Layers. For the frame, the new Frames guide: which standard size fits, oak or black, and whether to add a mat.
