

AN OBJECT

The wool throw

Autumn's object is the one you reach for without thinking: the wool throw over the arm of the sofa. Bought well — real wool, undyed or in an earth tone, a honest weave — it is a thing you keep for twenty years and that gets better, softer, more yours, the whole time. It is warmth you can see before you feel it, and the single fastest way to turn a summer-bare room back toward the season.

The Japandi move is restraint even here: not a pile of throws but two, layered, in the same warm family. One chunkier, one finer; one cream, one taupe. Folded over the same arm, they read as considered warmth rather than a laundry basket — comfort that has been composed.

"Buy the wool once. It will outlast the sofa it sits on."
