

THE WALL BEHIND

One tonal study, for the warmth

Autumn is the season for the tonal-study prints — the Warm Earth, the Two Woods, the colour fields of terracotta and ochre that echo the very palette of the room. A single tonal print on the wall behind the gathering table holds the season's warmth even by day, and ties the whole composition together.

For the print, the Calm & Oak Collection. For the frame, the new Frames guide — which standard size fits, oak or black, and whether to add a mat to lift it gallery-grade.
