#### 4. INFORMATION ON THE CONTENTS AND RESULTS GAINED

- 4.1. **Mode of study:** Full-time (lectures, classroom teaching, self-study, group work, project work, workshops, interdisciplinary teaching, supervised project work, social network, e-learning, voluntary internship and exchange).
- 4.2. **Programme requirements:** The objective of the MSc in Economics and Business Administration is that students should acquire the scientific skills and competence to identify and develop solutions for business-economic problems in private and public companies and organisations.  
The programme will help students acquire this competence by providing them with both general understanding and specialised knowledge, to the effect that the graduate in the solving of problems pertaining to business economics may employ in-depth knowledge of the field as well as independently acquire, produce and utilise new knowledge.  
Through participation in the programme, the student should also acquire the ability to collaborate with people having the same or another educational background in working with and solving problems that involve a variety of fields.  
The study programme consists of mandatory courses called a concentration (60 ECTS credit points), elective courses (30 ECTS credit points) and concludes with a master's thesis (30 ECTS credit points).  
Concentration:  
The concentration in Finance and Investments provides students with a deep understanding of the structure and workings of financial markets and the financial industry. Building on relevant quantitative and IT skills, students learn to master state-of-the-art theoretical and empirical models for investment decisions, for the pricing of financial securities, and for risk management in corporations and financial institutions. On some MSc EBA concentrations it is possible to sign up for a double degree. This means that you will obtain a degree from both CBS and another university. However, the prerequisite for this is that there is a formal agreement with one of our partner universities, and the programmes can be said to be equivalent. On a double degree, the student finishes his or her first year at CBS, and then completes the second year and the Master's Thesis at the partner university. There can be variations on this formula. If a student completes a double degree, he or she will receive a diploma from both CBS and the partner university.  
MSc EBA students have the opportunity to obtain a CEMS degree in International Management (MIM). This programme is an international degree developed by the best business schools in the world in cooperation with leading international companies. This programme is taken simultaneously with the second year of the MSc EBA. If a student completes a CEMS degree, he or she will receive a CEMS diploma from the CEMS organization as well as a diploma from Copenhagen Business School.

## 8. INFORMATION ON THE NATIONAL HIGHER EDUCATION SYSTEM

### The Danish Higher Education System

Public higher education institutions in Denmark are regulated by national legislation concerning degree structures, teacher qualifications and examinations. Accreditation in higher education has changed from programme-based accreditation to institutional accreditation. Institutions are accredited by the Accreditation Council, a national independent body.

#### Higher education institutions

Higher education is offered by five types of higher education institutions:

1. Business Academies (*Erhvervsakademi*) offering professionally oriented short and first cycle degree programmes.
2. University Colleges (*Professionshøjskole*) offering professionally oriented first cycle degree programmes.
3. Maritime Education and Training Institutions offering professionally oriented short and first cycle degree programmes.
4. General and specialised research universities (*Universitet*) offering first, second and third cycle degree programmes in academic disciplines.
5. University level institutions offering first, second and third cycle degree programmes in subject fields such as architecture, design, music and fine and performing arts.

Most of the higher education institutions are regulated by the Ministry of Higher Education and Science (type 1-5). The Ministry of Culture regulates a small number of higher education institutions (type 5).

#### Qualifications framework

The qualification levels form the basis for the Danish National Qualifications Framework for Higher Education, which is certified in accordance with the overarching Bologna Framework according to the principles adopted by the European Ministers of Higher Education. Danish higher education qualifications at levels 5-8 of the Danish Qualifications Framework for Lifelong Learning (NQF) correspond with levels 5-8 of the European Qualifications Framework (EQF). Generic level descriptions of learning outcomes can be found at [www.nqf.dk](http://www.nqf.dk).

Admission to some particular programmes requires entrance examination or submission of a portfolio of artistic work. Holders of an Academy Profession degree can obtain a Professional Bachelor's degree within the same field of study through a top-up programme. Completion of a first cycle degree qualifies students for admission to the second cycle.

- The Master degree (*masteruddannelse*) is awarded after studies at second cycle level.
